2. All prior office actions are fully incorporated into this office action by reference.

***Status of Claims***

3. Claims 21-41 are pending.

***Product by Process***

***Rejection, 35 USC 102 or 103(a)***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2129

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 21-41 rejected under 35 USC 102(b) as anticipated by or in the alternative, under 35 U.S.C. 103(a) as being obvious over Widrow (USPN 3,222,654, referred to as **Widrow**).

Widrow teaches a logic circuit and electrolytic memory element (perceptron) illustrated in Figs. 1 and 2 and described in the text of the related patent and more specifically @ **Widrow**, c1:10-14; c1: 40-48; c3:18-28. Other related text of Widrow are identified in prior office actions.

The applicant has disclosed a physical neural network that achieves functionality by the process of applying an electric field across two electrodes that are immersed in a liquid dielectric solvent containing nanoconductors. It is through the process of applying the electric field that the nanoconductors align to form the physical neural network nanoconnectors between pre-synaptic and post-synaptic electrodes. Such is a product by process ... neural network developed by the process of applying the electric field. In re Brown, 459 F.2d 531, 535. 173 USPQ 685, 688 (CCCPA 1972) applies.

### **Conclusion**

8. Claims 21-41 are rejected.
